

## SUCCESS STORY | AVERETT UNIVERSITY

**After**

### Key Facts

- \$23,000 in Annual Savings
- 77% Reduction in Energy Consumption
- 2.8 Years Payback

### Project Details

US Lighting Systems designed a custom photometric lighting layout to ensure even lighting. We increased the foot-candle levels by over 25% and reduced the cost of energy by 75%. Averett can anticipate annual energy

savings of nearly \$23,000. At US Lighting's recommendation, Averett also installed a Synapse Lighting Controller, which serves as the controller of the new lighting system. It controls every light in the school.

One of the main attractions, Grant Center gymnasium, where the school hosts major sporting events, was in need of an LED upgrade.
